

Programme Manager

Type of Post	:	Permanent
Speciality	:	Waste Management / Decommissioning
Country	:	UK
Region	:	UK Wide
Hours	:	37.5 per week

Role Description

EDF is the world's leading nuclear power station operator, currently operating 71 reactors in France and the UK. As such, EDF has a vision to become the European Leader in Decommissioning and Waste Management, providing services to other nuclear operators and ensuring mastery of the decommissioning process for its own fleet. To support this vision, EDF has established the Cyclife Group to deliver commercial decommissioning and waste services in the market. Cyclife UK currently has four business lines covering: Consultancy, Site Projects, Waste Treatment and Decommissioning via a nuclear-licensed waste treatment facility in Cumbria and international facilities in Sweden and France.

Cyclife UK is working closely with its sister company EDF Energy and we have a number of roles available to support the AGR decommissioning Programme – including Programme Managers for a range of technical programmes associated with the AGR Deconstruction Programme.

Your Work Environment

Duties and Responsibilities

1. Establishment and continual development/maturation of the Deconstruction Programme for specific technical areas:
 - Establish the technical programme based on industry best practice and technical information available to date
 - Identify and implement optimisations for the area of work and drive the technical delivery/underpinning of the programme
 - Develop a series of programmatic requirements, benefits, end-points and critical success factors for constituent projects and workstreams.
 - Lead technical team in delivery of strategy for the workstream
 - Technical challenge of the content of the work-programme areas to ensure that the activities, cost and schedule are optimised
 - Establish a Lead and learn approach across the work-programme.
2. Management of stakeholders and key interfaces, both internally within EDF Group and externally
3. Own the definition and planning for the works of the years to come for relevant work under the programme that define or enable critical path achievement.

Key Skills and Qualifications

- Appropriate qualifications in an Engineering or Science discipline.
- Previous nuclear decommissioning experience, in particular in development of decommissioning scenarios.
- Project and programme management experience.
- Demonstrable record of success in leading complex programmatic type activities in a technical, operational or engineering environment.
- Knowledge and experience of working with nuclear sites in the UK is required.
- Working knowledge of AGR site processes and systems that enable work planning and delivery to be conducted.
- Previous experience of working with NDA and Magnox desirable.
- Leadership experience addressing programme or project issues and requirements.
- A working knowledge of risk management.
- Excellent stakeholder management skills.
- The ability to apply problem solving, technical and people leadership skills to develop structured, innovative and fit for purpose solutions that can address issues which open-scope and not well defined.
- Personal resilience and the ability to deal with uncertainty and change; the ability to support programme team members in an environment of uncertainty and change.
- Technical report writing to a good standard of English.
- Excellent communication skills.
- Capable of obtaining (or currently holds) UK Nuclear industry clearance.

How to apply
