

Project Engineer

Type of Post	:	Permanent
Speciality	:	Decommissioning
Country	:	UK
Region	:	UK Wide
Hours	:	37.5 per week

Role Description

EDF is the world's leading nuclear power station operator, currently operating 71 reactors in France and the UK. As such, EDF has a vision to become the European Leader in Decommissioning and Waste Management, providing services to other nuclear operators and ensuring mastery of the decommissioning process for its own fleet. To support this vision, EDF has established the Cyclife Group to deliver commercial decommissioning and waste services in the market. Cyclife UK currently has four business lines covering: Consultancy, Site Projects, Waste Treatment and Decommissioning via a nuclear-licensed waste treatment facility in Cumbria and international facilities in Sweden and France.

As part of our growth we are looking for Project Engineers. The main purpose of the role is the provision of project and technical services in support of all aspects of the Company's business and fulfil specific contracts including control of costs, programme and manpower to contract requirements.

Your Work Environment

Duties and Responsibilities

- Delivery of projects to agreed programme, budget and quality targets.
- Identifying, escalating and managing any matters that could pose a potential contractual/commercial risk at the earliest opportunity.
- Preparing, scheduling, coordinating and monitoring assigned technical and engineering work packages with technical information and materials.
- Ensuring the scope of projects is delivered safely, at the right quality on time and to budget.
- Ensure projects are delivered in accordance with the requirements of the CDM regulations.
- Supporting the PM to achieve the overall project programme, within time, cost and quality.
- Supporting the PM in the day-to-day duties and responsibilities.
- Closing out the project on completion, archiving project documentation, updating market information, ensuring that lessons learnt are captured and disseminated internally and ensuring that a Client Satisfaction survey is initiated.
- Prepare Method Statements, Risk Assessments and Task briefings to ensure a Safe System of Work.
- Ensure all work is carried out in accordance with Management Systems.
- Assist less experienced colleagues in ensuring compliance with pre-defined standards.
- Liaise with suppliers, clients and regulators.

Key Skills and Qualifications

- Degree in a science or engineering subject.
- Formal Project Management Qualification.
- Ability to work cross functionally with a team both technically and non-technically.
- Embrace lean principles and utilise concepts such as standard work to drive continuous improvement.
- Experience of working with Magnox/ NDA/ EDF decommissioning
- Experience in managing multiple parallel projects.
- Experience and familiarisation of Project Management software and toolsets.
- Experience of various forms of engineering or construction contracts.
- Resilience and proven ability to behave professionally in challenging and confrontational circumstances.
- Technical report writing to a good standard of English.
- Excellent communication skills.
- Capable of obtaining (or currently holds) UK Nuclear industry clearance.

How to apply

Please express interest by sending your CV to Recruitment@cyclife-edf.co.uk with the following reference: Project Engineer.

Successful candidates will then be invited for an initial Teams/Skype interview.
