With its **first-rate human resources**, **R&D** capability, expertise in **engineering** and **operating** generation plants and networks, as well as its **energy eco-efficiency** offers, the Group delivers **competitive solutions** that help ensure **sustainable economic development** and **climate protection**. The EDF Group is the **leader** in the **French** and **UK** electricity markets and has **solid positions** in **Italy** and numerous other **European** countries, as well as industrial operations in **Asia** and the **United States**. Everywhere it operates, the Group is a **model** of **quality public service** for the energy sector.

**37 million**  
customers worldwide

**630.4 TWh**  
electricity generation worldwide

**108.9 g of CO<sub>2</sub>**  
per kWh generated (CO<sub>2</sub> emissions from EDF Group electricity and heat generation)

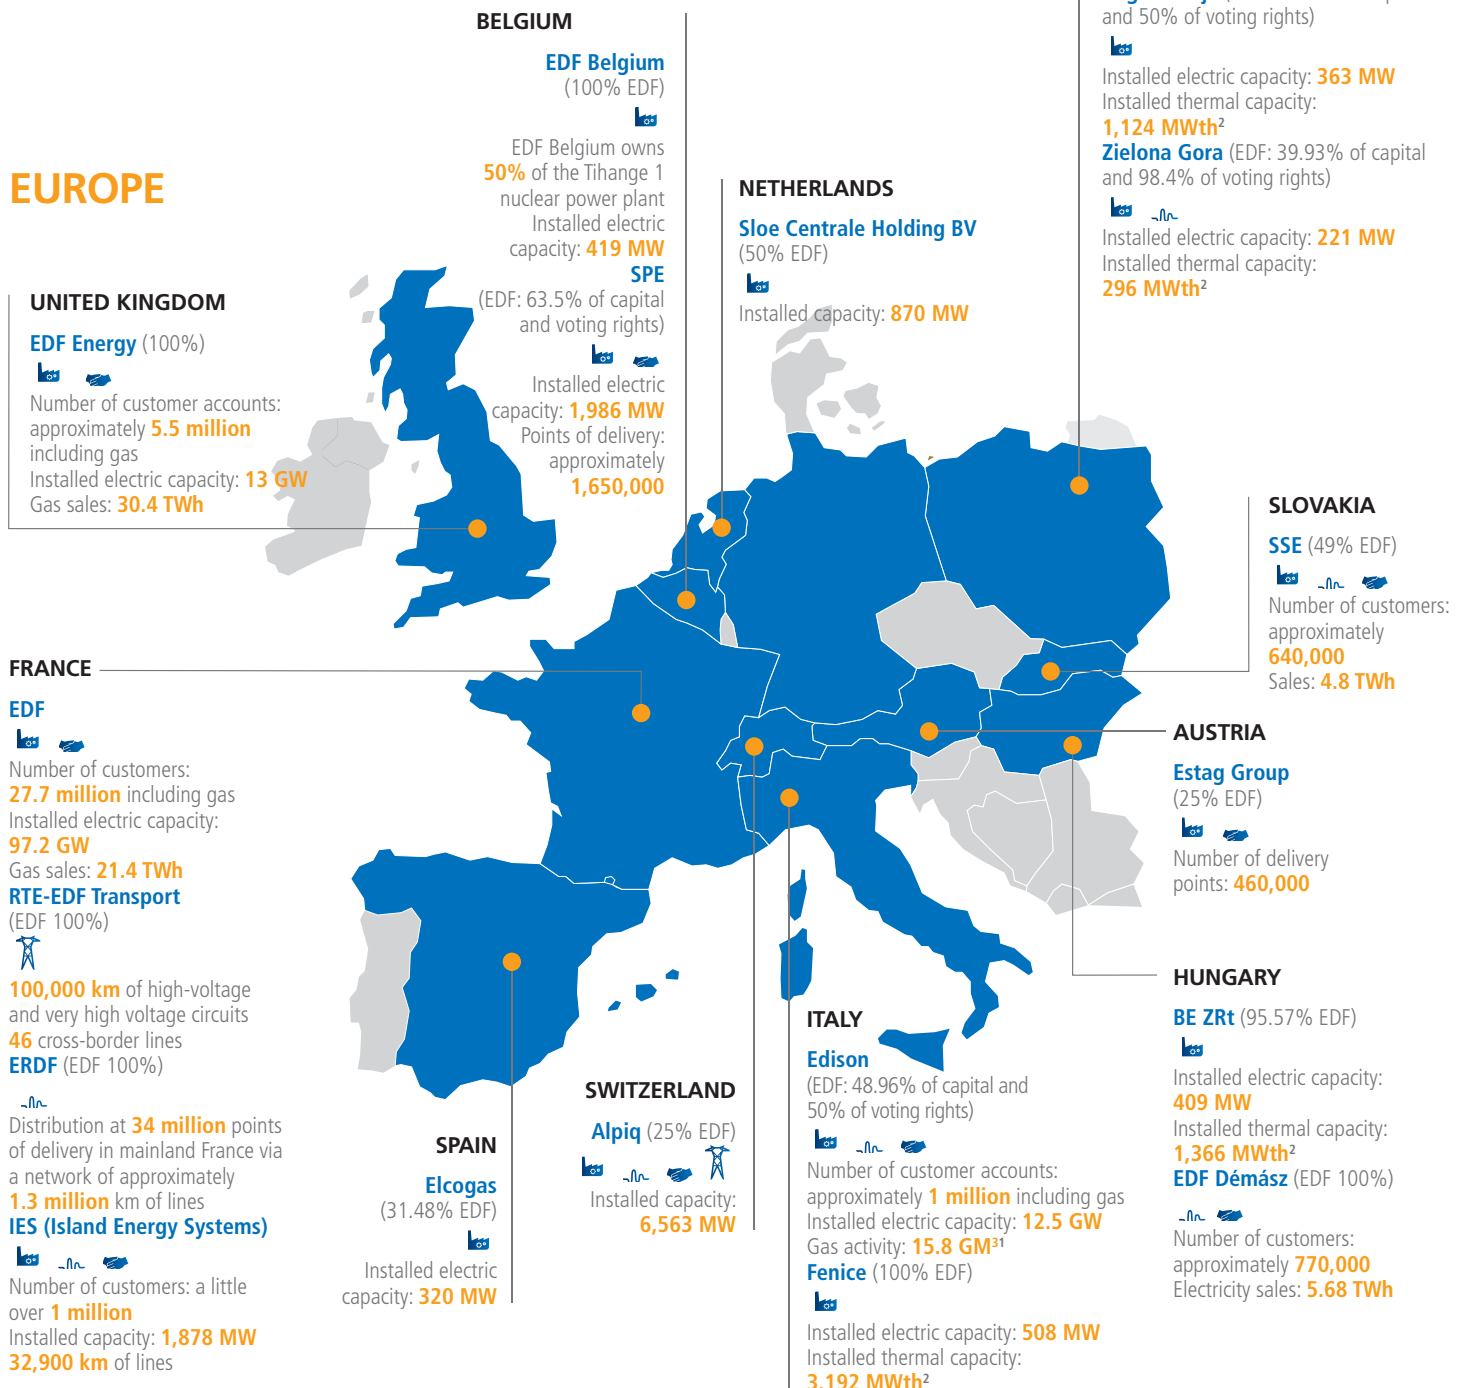

**158,842**  
employees worldwide

**€65.2 billion**  
in sales

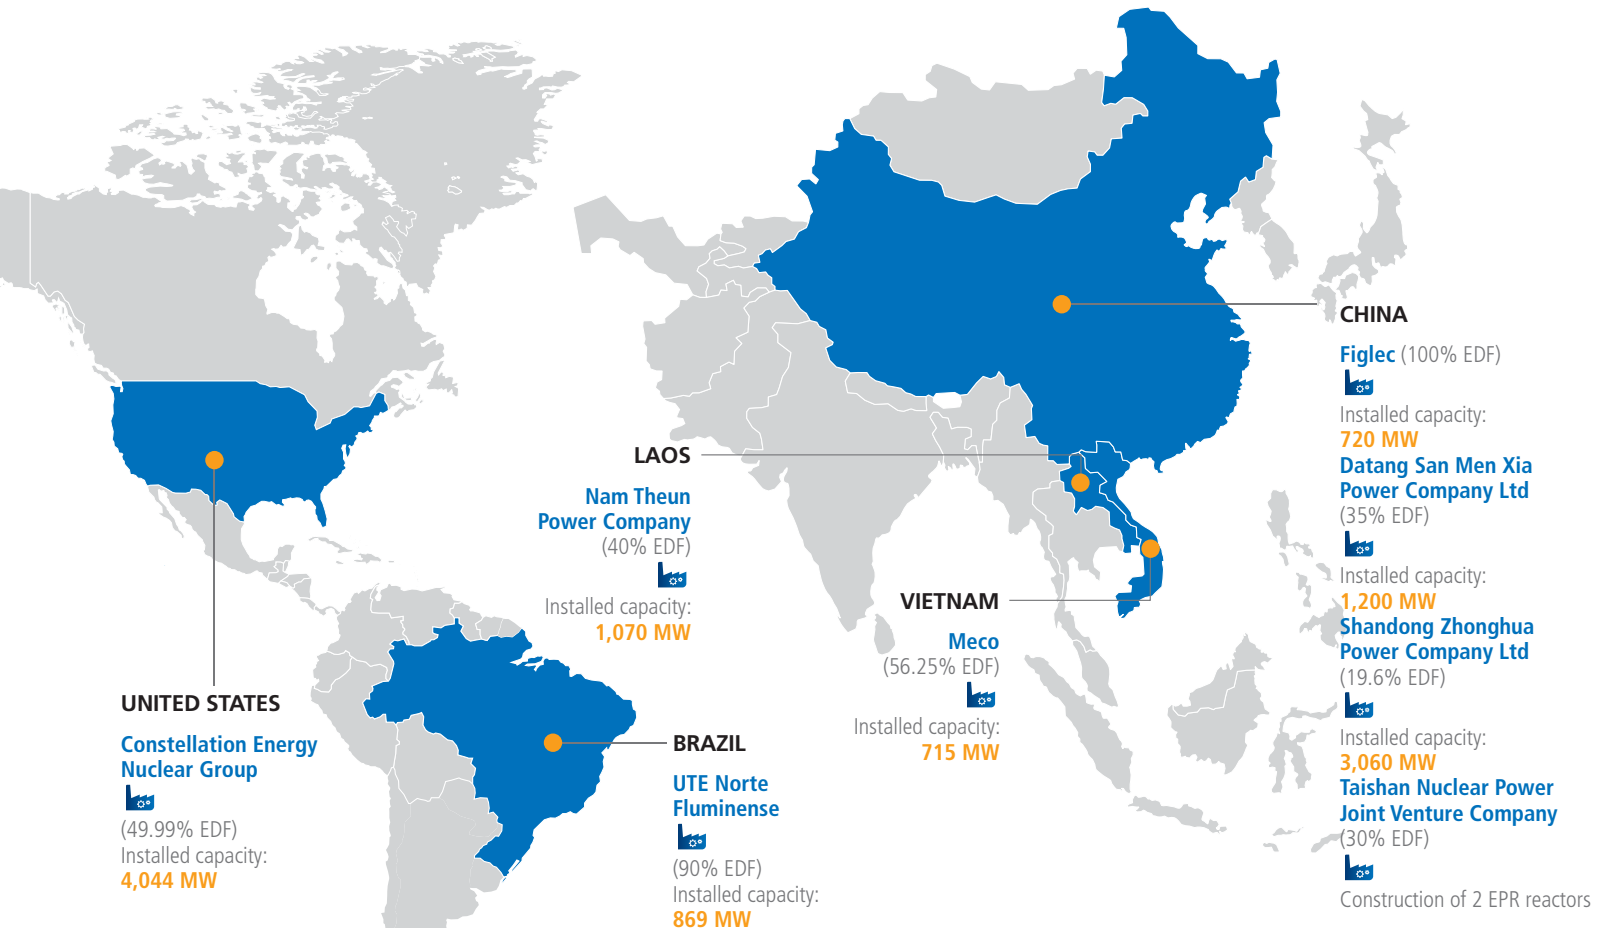

# Mapping Group operations

The EDF Group is active in more than 30 countries. Its global operations focus on three core businesses: generation, networks and sales and trading.

## EUROPE

## OTHER COUNTRIES WORLDWIDE

## OTHER ACTIVITIES

### EDF Energies Nouvelles (50% EDF)

⚡  
Installed capacity: **3,422.6 MW**  
Total capacity of facilities in which EDF Energies Nouvelles has a stake

### Tiru (51% EDF)

⚡  
**3.7 TWh** of electricity and steam sales, of which **50%** was clean energy (excluding heating), generated from **3.9 million** tonnes of recycled waste

### Electricité de Strasbourg (88.82% EDF)

⚡  
Number of customers: **488,000**  
**6.4 TWh** of electricity and **0.2 TWh** of gas sales

### Dalkia (EDF: 34% of capital and voting rights of Dalkia's holding company)

⚡  
Optimized energy management

### EDF Trading (100% EDF)

⚡  
Traded volumes (approx.): **3,306 TWh** of electricity  
**120 billion** therms of natural gas  
**411 million** tonnes of coal  
**813 million** barrels of oil (primarily by-products)  
Around **233 million** tonnes of CO<sub>2</sub> emission certificates

1. Gross global gas volumes handled by the Group's companies including plants' internal consumption.  
2. MWth: thermal MW for cogeneration, as opposed to MW of electricity.
