

# EDF group's net renewable capacity by country (in MWe) at 31/12/2018

Hydropower Wind Solar Biomass Tidal Geothermal Renewable Heat (in MWth)

The share of renewable energy in EDF group's installed capacity increased to 25%. Excluding hydro, the Group had 9.2 GW of net installed wind and solar power capacity in 2018. It has launched an unprecedented acceleration in renewable energy with the aim of doubling the installed capacity at its renewable facilities from 28 GW in 2014 to 50 GW in 2030.

Data consolidated according to EDF's percentage ownership in Group companies, including associates and joint ventures.

● Europe ● Americas ● Asia ● Africa / Middle East

The values correspond to the expression to the first decimal or integer closest to the sum of the precise values, taking into account rounding.  
 (1) Including small hydropower plants in France and assets in overseas France.  
 (2) Excluding EDF Renewables' energy storage capacity and biogas generation.
