

# EDF group's net renewable capacity by country (in MWe) at 31/12/2019

Hydropower  
 Wind  
 Solar  
 Biomass  
 Tidal  
 Geothermal  
 Renewable heat (in MWth)

EDF group is the leading electricity company for installed capacity in renewables in France and the European Union, and it confirmed its acceleration in renewable energy in France – with almost 200 MW of capacity commissioned, 2019 was a record year for onshore wind power. The acceleration is part of the Group's CAP 2030 strategy, the goal of which is to double global capacity in renewables to 50 GW net in 2030.

|| Data consolidated according to EDF's percentage ownership in Group companies, including associates and joint ventures.

● Europe ● Americas ● Asia ● Africa/Middle East

The values correspond to the expression to the first decimal or integer closest to the sum of the precise values, taking into account rounding.  
 (1) Including small hydropower plants in France and assets in overseas France.  
 (2) Excluding EDF Renewables' energy storage capacity and biogas generation.
