EDF Energies Nouvelles signs a power purchase agreement for solar project in the US

enXco, EDF Energies Nouvelles US subsidiary, announced it has entered into a power purchase agreement with San Diego Gas & Electric (SDG&E) for a 130 MWp⁽¹⁾ solar photovoltaic facility in California.

Located in Kern County, California, the Catalina solar project will be developed, built and owned by enXco while SDG&E will buy the power generated under a 25-year power purchase agreement.

The power plant will be built in two phases with the first 60 MWp expected to be online by the end of 2012 and the remaining 70 MWp to be operational by mid-2013.

This project is subject to California Public Utilities Commission approval.

“The Catalina photovoltaic project represents the Group’s largest power plant developed in the U.S.,” said Tristan Grimbert, president and CEO of enXco. *“This agreement illustrates our successful solar business expansion in North America.”*

(1) *Equivalent to 110 megawatts (ac).*

About EDF Energies Nouvelles

With operations in Europe and North America, EDF Energies Nouvelles is a market leader in green electricity production. With a development focused on wind energy for several years and more recently on solar photovoltaic, the Group is also present in other segments of the renewable energies market: small hydro, marine energy, biomass, biofuel and biogas. In addition, the Group is expanding in the distributed renewable energies sector.

EDF Energies Nouvelles is a subsidiary of the EDF Group.
