

Startup Portfolio

2025

EDF PULSE INCUBATION is the EDF Group's intrapreneurship programme.

It was created to develop new businesses and accelerate the energy transition, and has enabled the launch of new subsidiaries within the EDF Group.

With EDF Pulse Incubation, the Group invests in those who have the courage to commit themselves to shaping the world of tomorrow.

EDF PULSE VENTURES is the EDF Group's corporate venture capital arm.

As a financial and strategic partner of start-ups, its mission is to identify new activities and innovative solutions developed by start-ups, to invest in them and work together to build a carbon neutral future.

With EDF Pulse Ventures, the Group is linking up with the innovation ecosystem to step up the pace in the race against climate change.

Helping customers
**reduce their
carbon footprint**

BEZERO is a **carbon offsets rating agency**. It assesses the quality of carbon credits completely independently using strict, scientific criteria, and publicly communicates its ratings to ensure transparency in the carbon credit market.

BeZero also provides carbon credit risk management tools. In particular, BeZero offers an ex-ante credit quality assessment system.

Status

Investment by EDF Pulse
Ventures: 2022
Founded: 2020
Employees: < 150

Markets

Companies, carbon buyers and sellers, climate platforms, project developers

Locations

Europe, USA, Asia

Offices in London and New-York

They trust them

Equinor, Total, Engie, EDF Trading, SouthPole, Watershed, Cloverly, Xpansiv, RWE, Petrobras, Vitol, Salesforce...

CARBON8 specialises in **CO2 sequestration based on the recovery of industrial waste**. The British start-up enables the recovery of certain dusts and ashes, and transforms them through the carbonation process into aggregates that can be used in the construction sector.

This solution enables manufacturers to reduce their CO2 emissions while better managing their waste to achieve their zero landfill target. The aggregates produced by the process are intended to be used in a circular economy approach in construction, particularly for sustainable housing.

Ventures: 2022
Founded: 2006
Employees: < 20

Markets

Industrial, in particular cement
and paper mills

Locations

Europe, USA, Asia

Offices in Nottingham

They trust them

VICAT, FLSmith, CRH, Cemex,
AVR, Mannok, Cory Group,
Mineralz, Veolia...

EXAION develops high-performance, innovative and sovereign **digital services**. In line with the Group's *raison d'être*, it supports companies in their digital transformation with a responsible and sustainable approach.

It offers 3 services:

- Exaion Node, for secure and simplified access to blockchain nodes on several protocols;
- Exaion Studio, for hosting virtual work environments for creative professionals and industry;
- Exaion Compute, for decentralised hosting of computing power, HPC and quantum computing.

Status

Markets

Large companies, VSEs, SMEs,
start-ups, research centres,
universities

Locations

Europe, North America

Offices in Paris, Lyon, Montreal
and San Francisco

They trust them

EDF, Crédit Agricole CIB, Ora-ïto,
Digital District, Société Générale -
FORGE, CEA, Groupe Casino,
BNP Paribas, Framatome, Meria,
Heverett, Lexistems

HYNAMICS produces and markets low-carbon hydrogen produced from water electrolysis, a technology that does not emit CO2 when the electricity is itself generated by decarbonised production methods.

As part of a partnership approach, HYNAMICS supports the customer throughout the value chain with a turnkey solution:

- Project design,
- Financing/investment in infrastructure,
- Construction,
- Operation & maintenance.

Status

EDF subsidiary
A product of EDF Pulse
Incubation
Founded: 2019
Employees: < 100

Markets

Industry (refineries, chemicals, metallurgy, etc.), public and professional heavy mobility (trucks, river transport, trains, buses, etc.)

Locations

Europe, United States, Asia

Offices in Paris and Berlin

They trust them

The Auxerre agglomeration,
Heide, Interreg...

MCPHY is a **designer, manufacturer and installer of equipment for hydrogen production (electrolysers).**

Its activities:

- Supply of industrial materials,
- Recharging of fuel cell electric vehicles,
- Storage and recovery of surplus electricity from renewable sources.

Status

Investment by EDF Pulse
Ventures: 2018
Founded: 2008
Employees: < 200

Offices in La Motte-Fanjas
(France)

They trust them

Audi, Continental, Engie, Grdf,
Total, Hynamics...

MONKEY FACTORY is a **provider of MaaS (Mobility As A Service) solutions**. It designed **MyBus**, France's leading mobile application (in terms of territorial coverage) providing easy access to public transport, soft mobility (bicycles, scooters, etc.) and/or shared transport. This platform is also distributed on a white label basis to local authorities via the **MaaSify** application.

The two platforms provide:

- Real-time passenger information,
- Route calculation,
- Purchase, validation and reservation of multimodal journeys.

Markets

Local authorities, industrial
companies, transport operators
and start-ups

Locations

Europe, Africa, Latin America

Offices in Paris

They trust them

RedBus, RATP Dev, FirstBus,
Transdev, Izivia, Chronopost...

OKLIMA is the EDF Group's subsidiary dedicated to **carbon contribution**. Oklima develops carbon sequestration and greenhouse gas emissions reductions projects (reforestation, agricultural land management...).

In France, these projects are certified by the "Low Carbon Label". Oklima also offers carbon credits from projects outside France, certified by international labels.

Oklima offers its customers the opportunity to finance these projects as part of their decarbonation strategy.

Status

Offices in Paris

They trust them

EDF, Enedis, VivaTech, Sezane,
United B, Mediatransport ...

PERFESCO offers a solution that enables industrial companies to reduce their carbon footprint and energy consumption. To this end, the start-up **finances the energy efficiency projects** of its customers, who thus do not have to finance anything. PERFESCO is then reimbursed from the energy savings achieved and measured.

PERFESCO carries out an audit of the sites and identifies the energy saving areas. The company then finances and carries out the work involved.

PERFESCO works on several areas of expertise: lighting, electric motors and furnace heating. In addition, the start-up finances specific projects in some cases.

Offices in Paris

They trust them

General Electric, Air France,
Toyota, SKF...

PERSEFONI offers a platform that allows companies and institutional investors to **measure, analyse, plan, anticipate and make public their carbon footprint**. Its solution complies with the methods of the Greenhouse Gas Protocol (GHG) and the Partnership for Low Carbon Financial Accounting (PICAF).

Persefoni covers the various emission scopes, including scope 3, by recovering emissions from suppliers, whatever their maturity on the subject. The platform also enables users to manage ESG reporting (CSRD, CDP, etc.).

Finally, a freemium version of the platform is available, with an interface designed for non-expert users, making the product accessible free of charge to SMEs

URBANOMY is a Group's subsidiary specialising in **energy and climate strategy consulting**. In concrete terms, the company offers its clients the opportunity to develop ambitious decarbonisation strategies with concrete action plans to help them reduce their greenhouse gas emissions as much as possible. It also provides energy masterplanning for local developments and building portfolio.

The company is involved in all aspects of decarbonisation:

- upstream: raw materials, their environmental impact, transport, etc.
- production processes and energy efficiency: consuming less
- and better downstream: distribution, transport, waste management, etc.

Producing **low-carbon electricity**

INICIO

Inicio is a French start-up specialising in identifying land opportunities for the development of photovoltaic projects across Europe. Using an in-house developed AI algorithm, Inicio identifies all plots in a region that meet solar developers' criteria within 48 hours. The start-up secures these lands from property owners before connecting them with developers.

METROSCOPE provides **SaaS software capable of reliably and automatically diagnosing anomalies on an industrial process**. This enables it to optimise the maintenance of installations, improve the operational performance of the business and its environmental footprint.

Its offering is based on:

- The creation of a digital model of the thermodynamic process to reveal anomalies in installations in real time,
- The use of artificial intelligence (AI) to diagnose the causes of anomalies and rank them in order of importance.

MX3D

MX3D is a Dutch startup specialised in **metal additive manufacturing** using **WAAM** (Wire Arc Additive Manufacturing) technology. Covering the entire printing ecosystem, MX3D markets complete turnkey printing systems while also providing on-demand printing services through the world's largest printing capacity. Additionally, the company has developed a proprietary software platform that integrates with any hardware (robots, welding heads) which enables printing metal parts from 3D models.

CHEMDOC WATER TECHNOLOGIES is a French SME that **designs and assembles containerized systems for the filtration, purification and demineralization of water** from surface water and wastewater recycling.

With its membrane filtration modules, the company is able to supply water of different qualities: demined, ultrapure, process and ingredient.

The solution is mainly used by energy, food and pharmaceutical manufacturers, as well as by local authorities, to reduce their withdrawals from surface water reserves (aquifers and rivers).
