EDF announces the financial closing of the Sizewell C project

EDF announces the financial closing of the Sizewell C project. EDF plans to invest a maximum of £1.1 billion during the construction period and will have a stake in the project of 12.5%, alongside the UK government with 44.9%, La Caisse with 20%, Centrica with 15% and Amber Infrastructure with 7.6%, as announced in the final investment decision in July [(1)]. EDF will not invest new cash at financial close due to the reimbursement of the development costs incurred since 2015 and a payment in return for the Hinkley Point C project expertise that Sizewell C benefits from, as well as the series effect.

Sizewell C has secured £5 billion in export credit financing guaranteed by BpifranceAE, as well as debt financing from the National Wealth Fund.

The Sizewell C project involves the construction of two EPR nuclear reactors at the Sizewell site, replicating the Hinkley Point C project led by EDF. It will help provide the United Kingdom with new carbon-free production capacity and generate competitive long-term electricity for six million households.
The EDF group will contribute to the project as a supplier of engineering studies (EDF/Edvance), the main primary circuit including the nuclear boiler, steam generators and safety control system (Framatome) and, for the conventional island, the turbo-alternator unit (Arabelle Solutions).
For the French nuclear industry more broadly with some forty French suppliers, it will help to perpetuate skills, capitalise on experience and generate economies of scale for the EPR2 programme in France.

About EDF

The EDF Group is a key player in the energy transition, as an integrated energy operator engaged in all aspects of the energy business: power generation, distribution, trading, energy sales and energy services. The Group is a world leader in low-carbon energy, with an output of 520TWh 94% decarbonised and a carbon intensity of 30gCO2/kWh in 2024, a diverse generation mix based mainly on nuclear and renewable energy (including hydropower). It is also investing in new technologies to support the energy transition. EDF's raison d'être is to build a net zero energy future with electricity and innovative solutions and services, to help save the planet and drive well-being and economic development. The Group supplies energy and services to approximately 41.5 million customers[(1)] and generated consolidated sales of €118.7 billion in 2024.

(1) The customer portfolio consists of electricity, gas and recurring service contracts
