

GEODIS and EDF Commit to Decarbonizing the Supply Chain in France and Internationally

On December 8, 2025, GEODIS, a global leader in transport and logistics, and EDF announce the signing of a partnership aimed at decarbonizing the supply chain in France and internationally.

The purpose of this partnership is, on the one hand, to significantly reduce the carbon footprint of GEODIS' warehouses and transport flows worldwide, and on the other hand, to examine the conditions under which GEODIS could provide logistics services on behalf of the EDF Group in the main countries where it operates.

As part of this agreement, the two groups will explore solutions focused on:

- Low-carbon energy supply for GEODIS sites in France and abroad;
- Optimization of energy performance in GEODIS' logistics facilities: audits, consumption optimization plans, and innovative solutions such as heat recovery;
- Local production of renewable energy at GEODIS sites, notably through the installation of solar panels on warehouse roofs and the development of solar carports;
- Deployment of charging infrastructure for GEODIS' light vehicles, utility vehicles, and heavy trucks, as well as those of its subcontractors, to accelerate the overall electrification of the logistics ecosystem;
- Enhancement of GEODIS' land assets, including studies on the potential transformation of certain sites into data centers.

Finally, EDF and GEODIS will assess how GEODIS could provide logistics services such as procurement, storage, and distribution of materials and equipment for energy production projects.

The first Strategic Steering Committee will be held in the coming days to ensure effective monitoring of the agreement and related projects.

For topics within their scope of expertise and activities, EDF Group subsidiaries such as Izivia and EDF Power Solutions will engage in discussions with GEODIS.

Marie-Christine Lombard, Chairwoman of the GEODIS Executive Board, stated: *"The signing of this agreement marks a decisive step for our Group and is fully aligned with our decarbonization roadmap. This partnership allows us to put our expertise at the service of EDF while opening new development opportunities for GEODIS. It reflects the determination of two French leaders to join forces and take concrete, sustainable action for the environment."*

Marc Benayoun, EDF Group Executive Director in charge of the Customers, Services & Territories Division, added: *"As the logistics sector accounts for 16% of CO₂ emissions in France, its decarbonization is a critical challenge. This partnership demonstrates EDF Group's ability to support GEODIS, a global leader in transport and logistics, with a comprehensive range of solutions to improve its carbon footprint."*

About GEODIS – www.geodis.com

GEODIS is a leading global logistics provider acknowledged for its expertise across all aspects of the supply chain. As a growth partner to its clients, GEODIS specializes in four lines of business: Global Freight Forwarding, Global Contract Logistics, Distribution & Express Transport, and European Road Network. The Group operates a global network spanning nearly 170 countries and 50,000 employees. In 2024, GEODIS generated €11.3 billion in revenue. GEODIS is a company owned by SNCF group.

About EDF:

The EDF Group is a key player in the energy transition, as an integrated energy operator engaged in all aspects of the energy business: power generation, distribution, trading, energy sales and energy services. The Group is a world leader in low-carbon energy, with an output of 520TWh 94% decarbonised and a carbon intensity of 30gCO₂/kWh in 2024, a diverse generation mix based mainly on nuclear and renewable energy (including hydropower). It is also investing in new technologies to support the energy transition. EDF's raison d'être is to build a net zero energy future with electricity and innovative solutions and services, to help save the planet and drive well-being and economic development. The Group supplies energy and services to approximately 41.5 million customers(1) and generated consolidated sales of €118.7 billion in 2024.
