Appointment of Julien Garrel as Senior Vice President, International Nuclear Development at EDF

Julien Garrel has been appointed Senior Vice President, International Nuclear Development at EDF, effective November 2, 2026. He will retain a role within NUWARD as Non-Executive Chairman.

As Senior Vice President, International Nuclear Development, Julien Garrel will be responsible for:

- Continuing and accelerating the development of the Group's export sales activities, covering nuclear technologies, products, and services;
- Driving the development of export projects for both large power reactors and small modular reactors (SMRs) in support of ongoing and future opportunities;
- Strengthening strategic partnerships with states, utilities, and industrial stakeholders for the development of new nuclear programs outside France.

This appointment reflects the EDF Group's ongoing commitment to supporting the development of new nuclear power internationally. It comes at a time when many countries are reaffirming their nuclear ambitions to address challenges related to security of supply, competitiveness, energy sovereignty, and decarbonization.

About:
Julien Garrel, 47, is a graduate of the *Institut Supérieur d'Électronique de Paris*. He began his career with the EDF Group in 2002 within the Computer Networks and Telecoms Division, before joining the Commercial Division in 2005, and then the Group's Internal Audit Division in 2010. Between 2013 and 2021, he held several strategic positions, notably in the management of a Group subsidiary focused on energy efficiency and in overseeing the transformation of the BtoB business model. In 2021, he joined the Nuclear Fuel Division as Director of the Uranium Upstream Fuel Cycle, before becoming its Deputy Director. In January 2025, he was appointed Executive President of NUWARD.

About EDF
The EDF Group is a key player in the energy transition, as an integrated energy operator engaged in all aspects of the energy business: power generation, distribution, trading, energy sales and energy services. The Group is a world leader in low-carbon energy, with an output of 515TWh 95% decarbonised and a carbon intensity of 26.5gCO2/kWh in 2025, a diverse generation mix based mainly on nuclear and renewable energy (including hydropower). It is also investing in new technologies to support the energy transition. EDF's raison d'être is to build a net zero energy future with electricity and innovative solutions and services, to help save the planet and drive well-being and economic development. The Group supplies energy and services to approximately 41 million customers [(1)] and generated consolidated sales of €113.3 billion in 2025.
[(1)] The customer portfolio consists of electricity, gas and recurring service contracts
